

Maintenance Directions:

Proper maintenance and preventative maintenance are key to getting long term use out of your machine, as well as providing yourself with a safe riding experience. Your owner’s manual has a maintenance schedule log which to follow. We highly recommend having your oil changed by a power sports dealership which ensures a written record in case of a drive chain warranty issue. Change your oil after the first two (2) tanks of gas or 600 miles. Do not run the engine past half throttle during this period. All units require hands on maintenance from the owner. Maintenance should be performed before and after every ride. New units are in a “break-in” stage and require extra attention. Maintenance and preventative maintenance are not covered under your warranty. This is your responsibility. Your machine comes standard with a tool kit and owners manual intended to be used by YOU. Make sure all fasteners are tight and all systems are in good working order. Lost parts are not covered by warranty. Books on safety as well as maintaining power sports equipment are available from book stores or through Extreme Motor Sales. Ask your representative for details. Riding in extreme wet or muddy conditions may cause severe damage to your unit and is NOT recommended and may constitute abuse which could void your warranty.

Always wear a helmet and eye protection as well as all other necessary safety equipment. This is the law if rider is 21 years of age or under. Read your owner’s manual and take a safety course before your first ride. ASI (800) 887-2887 www.atvsafety.org. Children should never ride unsupervised. Always ride within your means and do not attempt stunts, jumps, wheelies, or any trick riding.

The State of Florida requires you to title Off- Highway Vehicles that will be used on public lands. Extreme Motor Sales can help you with this if you prefer. All fees are the responsibility of the owner and are not included in the price of the vehicle.

1. Get acquainted with your machine. Before you ride, inspect your machine. Go through and make sure all fasteners, bolts, and screws are secure and tight and all systems are in good working order. Use a thread lock as necessary. (Available through Extreme Motor Sales or hardware stores.) Use 93 Octane gas for best results.
2. Change your oil a minimum of every three (3) months or sooner depending on the amount and type of riding that you do. Manufacturers mandate a break in oil change and “First Service” after 2 tanks of gas or 600 miles, whichever comes first. Failure to do this will void your warranty. Refer to owner’s manual for oil type and quantity.
3. Keep your chain clean and lubricated. Check chain for proper chain tension before riding. Adjust as needed. Grease all zerts on a regular basis. Lubricate all cables as necessary. Vehicles intended for off road use should have a leak preventer installed in tires. We recommend Green Slime. Check your tire pressure before riding. Follow manufacturers recommendations noted on tire for proper pressure. Use a battery charger or tender for vehicle battery when not in use to maximize battery life. You must do this on a daily basis on units with remote shut off switches. NEVER jump start your battery from your car, truck or any other vehicle. NEVER! This will void your warranty and can cause severe harm to your vehicle and rider.
4. Always keep an extra spark plug on hand. Make sure that your air filter is clean and oiled as necessary. Turn fuel pet cocks off when not in use. Drain gas out of your carb when not in use. Refer to your owner’s manual regularly.
5. Failure to complete your preventative maintenance will constitute abuse and may void your warranty!

Services:

1. Break-In Adjustments and Checkup.....\$99.99
(Basic Oil Change, check over fasteners and tighten, make any necessary external adjustments)
2. Basic Oil Change.....\$29.99
(Includes Oil)

Shop Rate (Hourly):

If you purchased machine to be worked on directly from Extreme Motor Sales\$55.00
Otherwise.....\$75.00

Storage Rate: If the machine is not picked up within 3 days of repair or service.....\$20.00/day
